

Information Security Forum for Texas State Government

Exhibit & Speaker Opportunities

Tuesday, May 15, 2012

Austin, Texas

On Tuesday, May 15th, the Texas Department of Information Resources (DIR) will host the [12th Annual Information Security Forum](#). This free one-day conference is DIR's most popular event and is open only to government personnel. TASSCC will again serve as the co-sponsor.

DIR invites interested vendors to participate in this educational event by exhibiting and/or providing a speaker. It is a unique marketing opportunity and an excellent chance to learn more about state government needs and to meet key staff responsible for these areas.

If you are interested in **exhibiting**, complete the attached Exhibitor Registration form and return it to DIR. The cost to exhibit is only \$425. We expect between 200-300 attendees from a wide variety of state agencies and universities. The event is targeted to Information Resource Managers (IRMs) and other IT and security decision-makers. Since this event often fills to capacity for both attendees and exhibitors, do not delay if you want to participate!

If you are interested in **providing a speaker**, please submit a proposal via the online form from the conference website by **February 15, 2012**. There will be approximately six 50-60 minute slots. All sessions must be purely educational and may not promote a particular product or service.

The focus this year is **Security Program Maturity**. Possible topics include:

- Information Security Program Maturity
- Security Assessment Process
- Threat Landscape/Risks
- Legal and Privacy Landscape
- Why improve security program maturity?
- Implementing Enterprise Solutions
- Governance
